

Don't miss the Commercial Drying Specialist (CDS) classes being offered through the Restoration Leadership Institute.

Commercial Drying Specialist (CDS) is an advanced drying concepts and management course. During the course, students will learn how to evaluate commercial structures, improve their inspection techniques, learn advanced psychrometric charting, and how to better manage a large drying project.

The goal of this course is for students to be proficient in the drying process for a commercial or complex structure.

Want to Save \$300 on Your Class Registration?

Procura is the newest, comprehensive website providing innovative solutions and economical product offerings to the construction, restoration and mitigation markets. Ken Larsen, CR, WLS, is the Director of Education for RLI. Mr. Larsen's 30+ years in the restoration industry include over 20 years as an independent restoration business owner, environmental consultant, contents restoration and software developer and Business Development Director for Disaster Kleenup International. He has been published in many international publications with a heavy focus on the world of water damage restoration and the science of drying.

GUEST INSTRUCTOR - Todd Bradley C.E.M., has worked for over 30 years as a specialist in the field of atmospheric control of temperature and humidity, specializing in low dewpoints for many varied processes. He is currently the application manager for cdims and the family of arid dry and arid-ice products. Applications include restoration drying, temporary construction drying, product drying, clean room humidity control, air-vey humidity regain control, packaging systems, ice arenas, environmental chamber control, frozen food production and storage as well as many other applications requiring active temperature and dewpoint control.
